Chief, Military Economics Branch, D/I

Revision of Economic Intelligence Statistical Handbook

1. We would like to suggest one addition to the Handbook and that certain data be coordinated with us before its inclusion.

2. The addition we suggest is to include the Soviet military expenditure estimates from IP-643 in a table with the defense expenditures explicitly announced so that a comparison of the two series may be made.

3. The data which we should like to have an opportunity to coordinate prior to publication is that which has appeared in the following tables:

2-(Defense as an end use share of GNP)  
10-(Military Age Groups)

25X1A9a
